AVIATION RICHLUBE

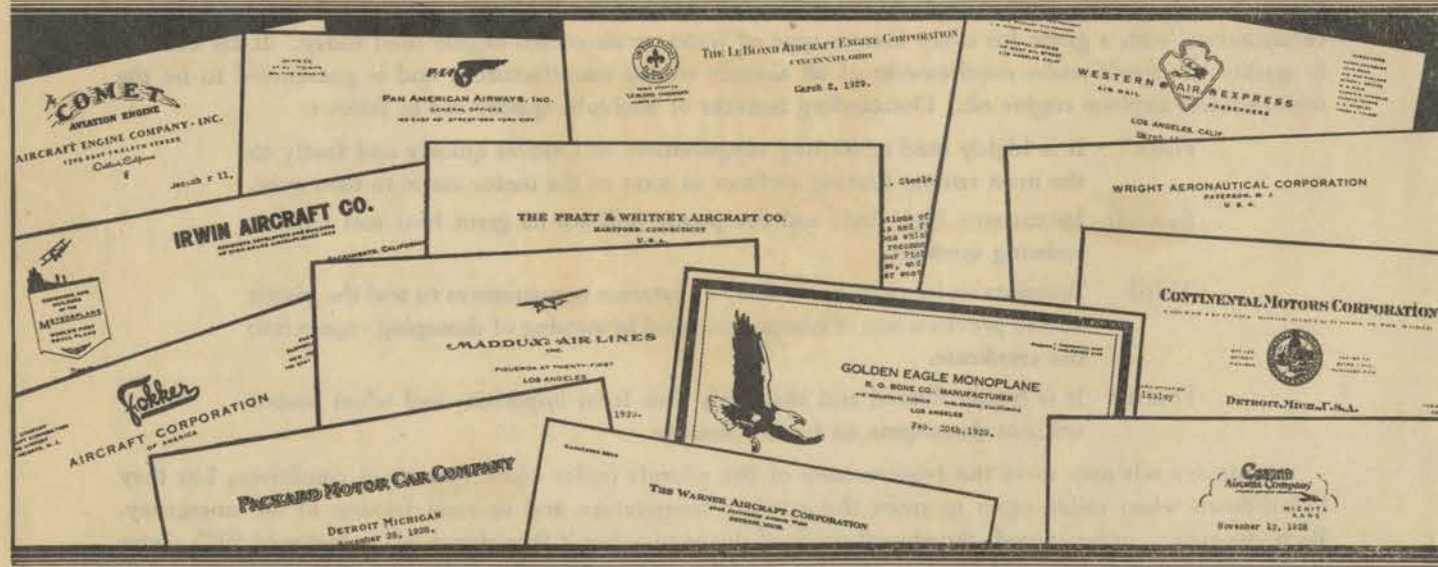

The World's Finest Airplane Engine Oil

Richlube Aviation Oil is a 100% pure Pennsylvania straight run product, especially refined from Pennsylvania's premium amber crude to meet the most exacting needs of aircraft engines. It is made in five consistencies, with a grade for every known type of water or air-cooled engine used today. It far exceeds in quality the specification requirements of all aircraft engine manufacturers, and is guaranteed to be the world's finest airplane engine oil. Outstanding features of Richlube quality are as follows:

- First: It is highly fluid at starting temperatures and moves quickly and freely to the most remote bearing surfaces as soon as the motor starts to turn over.
- Second: Its extreme high flash and fire points indicate its great heat and friction resisting qualities.
- Third: It maintains its viscosity or body at extreme temperatures to seal the piston and so prevents loss of compression and by-passing of damaging vapors into the crankcase.
- Fourth: It is highly filtered and absolutely free from impurities and when heated will not decompose or form a smudge.

Ordinary oils may meet the requirements of the aircraft under ordinary normal conditions, but they break down when called upon to resist the extreme temperature and unusual friction of an emergency. Richlube quality so far exceeds the normal needs of the engine that it furnishes a safety factor of 50% above most airplane engine oils, and after all, this security, this motor insurance is the very thing that you try to buy when you buy lubricating oil.

These leaders in the Air Industry recommend RICHFIELD AVIATION PRODUCTS

PILOT LOG BOOKS

Instructions for Use

1. The new owner should see that the manufacturer or seller makes the original entries in this Log Book as far as possible. Future entries are to be made and signed by the pilot or his authorized agent.
2. Entries must be made in ink.
3. Pages must not be torn from this Log Book, and erasures are not allowed. If a mistake is made, cross it out but do not attempt to erase.
4. None but licensed mechanics may work on a licensed airplane. Initials and number of mechanic must be shown when repairs are made.
5. Any information such as manufacturers' notes, record of test, diagrams of timing, etc., should be placed in the slips provided for that purpose inside the book cover.
6. Engine time records should be entered from the Navigation Log Book, a line for each day's running.
7. This Log Book should be kept up to date at all times and ready for inspection by Department of Commerce representatives or other authorized persons.

8 June 2, 1937 to Jan. 13 - 1944

Sept 16, 1937 was
the last flight logged
while Johnnie was employed
by Ryan's. Then he left to
join the "Bureau of Air
Commerce" (now. F. A. A.)

However, we came to San
Diego in the summer of 1939.
~~So I see on July 27 he flew a
Ryan. Since we were here
3 weeks in July, I should
think the July 22 and 2 July
20th entries were also at Ryan's.
I see they are listed San Diego
and the Ryan flight was
San Diego - Los Angeles and
Return.~~

staying at the home of Paul
+ Alma Wilcox.

I see that there are 4
entries of flights, 2 on
July 20th, one on July 22nd
+ one in a Ryan on July 27th,
1939

If that time were added
I figure it would total
4,648 hrs + 10 min.

I am not sure just what
information you are
interested in,

If you need the other
2 books, please let me
know. Sincerely
E. F.
